**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Nakano et al. (US 2002/0185974).

Regarding claim 11, Nakano discloses a light emission tube having a light emission portion (Fig. 2; Fig. 4, 11), and a thermal stress generation member (Fig. 4, 40; Page 4, Paragraph [0035]; Pages 4-5, Paragraphs [0040]-[0041]) for generating thermal stress by a temperature change at a time of switching the high pressure discharge lamp from an on status to an off status so that the thermal stress generates a compression stress in an upper portion of the light emission portion (Page 2, Paragraph [0015]).

***Allowable Subject Matter***

Claims 1-10 are allowed.

Regarding independent claim 1, the references of the Prior Art of record fail to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation wherein a pair of thermal stress generation members, base end sides of which are supported by the support structure, and tip end sides of which are connected to the side tube portions of the light emission tube.

Regarding claims 2-10, claims 2-10 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.
